

Upstate New York Association of Physicists in Medicine, Inc.

History of the UNYAPM – A Chapter of the AAPM

1975-2017

UNYAPM executive board – Lalith Kumaraswamy, Mubin Shaikh, Daryl P. Nazareth, Vikas Patel and Iris Wang

Formed in 1975, the Upstate New York Chapter is one of the youngest chapters of the AAPM.

Meetings, Symposia and Lecture Series

The UNYAPM holds its semi-annual meetings in the spring and fall of each year. Historically, the Upstate New York Chapter has cooperated with several organizations to hold special symposia related to Medical Physics. Since 2002, the historic Annual Kodak Lecture Series has been replaced with the Lifetime Achievement Award Lectures at the Fall meetings. In 2009, the UNYAPM began to hold the Young Investigator Competition during the Spring meeting.

Assembled for the Memorial Lecture are (left to right): Neal Tobochnik, Daniel bednarek, Arthur Haus, Martin Yaffe and Andrzej Krol

2003 Update New York

The Upstate New York Chapter of the AAPM held its semi-annual meeting at Strong Memorial Hospital in Rochester, NY on October 24. In addition to a business meeting, the program was comprised of presentations given by students and faculty aligned with various departments within the State University of New York (SUNY) system. From the Toshiba Stroke Research Center in Buffalo, NY, three students described their research, including James Corbett, who presented work which will be the year you had prior to the Young Investigator Competition of the annual AAPM meeting in San Diego.

Two interesting presentations from the Departments of Radiology and Radiation Oncology at SUNY Upstate Medical Center in Syracuse were delivered. Also, three students affiliated with the Department of Radiation Medicine at Roswell Park Cancer Institute in Buffalo gave talks on their research projects. Rotational from the program was John Biagi, PhD, from Tusculum College, who was invited to describe the state-of-the-art in tomotherapy. The highlight of the meeting, however, was the annual presentation of the chapter's highest accolade, the Award for Lifetime Achievement in Medical Physics. This year's recipient was John Cameron, Ph.D., who entertained with a very thought-provoking and controversial keynote address entitled "Longevity as the most appropriate measure of the health effects of radiation exposure". The next chapter meeting is scheduled for May 2004 and, as always, non-members are welcome to attend. Details can be obtained from the chapter secretary, Ken Hoffmann (khhoff@sunb.edu).
